

ACCELECOM

Accelecom Software-Defined Wide Area Network (SD-WAN)

SD-WAN: Empower Your Business with Reliable, High-Performance Networking

As your enterprise grows, so does the demand for a reliable, high-performance network. Accelecom's SD-WAN (Software-Defined Wide Area Network) solutions offer a modern, intelligent approach to managing your enterprise network, ensuring seamless connectivity, optimized performance, and robust security.

Key Features of Accelecom's SD-WAN:

- **Dynamic QoS:** Prioritize critical applications for optimal performance.
- **Intelligent Load Balancing:** Adapt to network demands for smooth performance.
- **Proactive Bandwidth Monitoring:** Monitor and optimize your network in real-time.
- **Integrated Wireless Backup Solution:** Ensure business continuity with automatic wireless WAN failover, providing seamless backup connectivity in case of primary link failure.

Key Benefits of Accelecom's SD-WAN:

Superior Application Performance:

Intelligent routing ensures smooth operation for critical apps.

Eliminate Downtime:

Wireless failover keeps your business online during outages.

Integrated Security:

Fortinet's top-rated security protects your network.

Multi-Point Connectivity:

Secure, seamless connections across all locations.

24x7 Support:

Dedicated team available anytime for assistance.

Cost Efficiency:

Leverage affordable broadband without compromising performance.

Why Accelecom's SD-WAN?

Integrating our SD-WAN with Fiber-based Dedicated Internet Access (DIA) and Wireless Backup guarantees continuous, high-speed connectivity, even in the face of unexpected outages. Coupled with Fortinet's industry-leading security solutions—ranked highest in Gartner's Magic Quadrant—your enterprise gains a high degree of confidence in its network security and performance.
